

# Vibe Board vs Microsoft Surface Hub

## Why choose Vibe over Microsoft?

In brief, the Microsoft Surface Hub is ideal for enterprises but comes with a high price tag, potentially limiting its appeal to small and medium-sized businesses (SMBs). Its user experience is closely tied to the Microsoft ecosystem. In contrast, Vibe offers an open ecosystem, enabling users to choose from a variety of third-party apps, including the Microsoft Suite and Google Workspace, providing greater flexibility and compatibility. Lastly, Vibe is available at a lower price yet offers more functionalities.
